CAREER OBJECTIVE

Driven and detail-oriented IT/Engineering graduate with a strong foundation in software development, troubleshooting, and systems management. Passionate about research and continuously exploring innovative solutions across technology and engineering. Skilled in coding, system analysis, and problem-solving, with additional expertise in 3D design and modelling. Seeking an entry-level role where I can leverage technical skills, creativity, and analytical thinking to deliver efficient, innovative solutions while contributing to organizational success and continuous learning.

SKILLS

- Programming languages: JavaScript, React Native, React.Js
- Troubleshooting and technical support
- Software development and testing
- Technical documentation and reporting
- Data representation: MATLAB
- 3D Design: SolidWorks

- Network configuration and administration
- Version control systems (Git)
- System analysis and design
- Agile and Scrum methodologies
- Data Management: Exel

EXPERIENCE

Aquila Logistics
NYSC Intern   March 2025 – Dec 2025

- Managed and maintained a database of over 560 drivers, applying data management skills to ensure accuracy and efficiency in operations.
- Supported the IT team by troubleshooting and assisting in minor hardware and software repairs to maintain smooth operational workflows.
- Participated in recruitment processes by screening candidates, preparing onboarding materials, and maintaining updated personnel records.
- Gained experience in financial processes, further developing a holistic understanding of business operations.

Revaya Limited (Remotely)
IT Support Intern   Dec 2024 – Jan 2025

- Address end-user inquiries related to hardware, software, and network issues through phone, email, or in person support, ensuring timely resolutions.
- Install, configure, and maintain desktops, laptops, printers, and other IT equipment to meet organizational standards.
- Diagnose and resolve technical problems related to operating systems, software applications, and peripheral devices.
- Assist in setting up and maintaining user accounts, passwords, and access controls within the organization's IT systems.
- Perform network troubleshooting, including addressing connectivity issues, configuring Wi-Fi, and monitoring network performance.

MidTown Tech Hub
3D Operator/Robotics Teacher   Apr 2023 – Sept 2023

- Prepare digital 3D models for printing using CAD software.
- Collaborate with the design and engineering teams to optimize print settings and improve print quality.
- Operate and manage the Creality Ender 3 V2 Pro 3D printer.
- Teach programming languages and tools commonly used in robotics, such as Python, C++, and Arduino.
- Guide students through hands-on robotics projects, from concept to completion

Side Hustle Nigeria
Frontend Intern   Apr 2022 – June 2022

- Designed webpages for businesses using HTML
- Created fonts, and colors for webpages using CSS
- Improved the functionality of webpages using JavaScript
- Worked with other developers to create web pages for a capstone project
- Used Git and GitHub for version control

EDUCATION

Bachelor of Engineering – Mechanical Engineering (2024)   University of Benin
